Undergraduate Degree Requirements (ABJ)
Digital and Broadcast Journalism

Positions in producing, reporting and anchoring news, feature, sports, entertainment and weather information for television, radio, online and mobile news providers

Students learn the skills necessary for on-air opportunities in gathering, analyzing, and delivering the news on radio and television. The major provides students with professional courses of study in both the theory and practice of broadcasting. Opportunities for employment exist in the emerging new media outlets, the Internet, interactive television, etc. Graduates generally begin in small market stations and work into larger markets.
